

# Adobe Dreamweaver CC 2018 – Intermediate/Advanced

Two-Day Course

Windows and Macintosh

## Course Overview:

This course is a continuation of the Dreamweaver CC 2018 Introduction course. It is an intensive, hands-on guided tour of producing a CSS based layout and website. You will explore in-depth techniques while working with external CSS pages such as designing a table-less layout, including creation of rollovers entirely in CSS. You will also learn how to create custom code snippets that will save you time by reusing the code, add interactive behaviors via JavaScript and start working with jQuery widgets! In addition, this course will cover some very useful techniques as well as explore some of the new features in Dreamweaver CC that will speed up your workflow.

## Course Content:

- Using the site setup advanced mode
- Controlling layout with CSS
- Using the new CSS Designer
- Structuring pages with DIV tags
- The box model
- Understanding floats
- Using relative and absolute positioning
- Using the quick tag editor
