

## Course Overview:

Adobe InDesign CC 2018 is a professional publishing program which combines page layout graphics and typesetting features. This is a comprehensive course designed for those people who have little or no formal training or experience using a page layout program. In this course you will learn to set up a multi-page brochure, newsletter or template correctly and efficiently. You will also learn how to edit an existing document, insert & import text and graphics. Other topics covered include: backing up of files, formatting and sharing InDesign documents and exporting for web and printing.
